

# Welcome to India Energy Week 2025

**We are excited to announce  
that Norway plan to exhibit at  
India Energy Week in February 2025!**

This flagship event of the Indian government will gather energy experts and decision makers from India and abroad, and the event is a fantastic opportunity for the Norwegian energy industry to showcase technologies and solutions in Oil & Gas, Subsea, seismic surveys, LNG, renewables, geothermals, hydrogen and energy storage.

With all exhibition space currently sold out, we are working on expanding our presence to maximize Norway's impact at the event. We invite interested Norwegian companies to join Team Norway and explore the significant opportunities in the Indian market.
